This report presents background information for the nine comprehensive planning elements as defined in the Wisconsin comprehensive planning legislation signed into law, by Governor Tommy Thompson, in 1999. Its main purpose is to provide an information baseline, which will serve as the foundation as East Central works, cooperatively with citizens, local governments and interest groups, to develop a policy framework for the future of the region. The preparation of this report was financed in part by a grant from the Wisconsin Department of Administration, Office of Land Information Services (OLIS).
